SARAH WEBB SERVES AS A LARGE ANIMAL STUDY DIRECTOR FOR THE OPHTHALMOLOGY PROGRAM AT BIOMERE

Prior to joining Biomere, Sarah was a research scientist in the Glaucoma department at Alcon Laboratories in Fort Worth, TX. Sarah has been with Biomere for 6 years and was directly involved with the development of the Ocular Program. Over the past 3 years, Sarah has worked on various projects and model development which include studies specializing in comprehensive ocular dosing techniques, gene therapy, wet-AMD, and various glaucoma models.

Sarah received a bachelor's degree in Applied Sciences from Saint Petersburg College in 2013. Sarah worked as a veterinary technician at Alcon Laboratories from 2004-2010 then as a scientist from 2010 until transitioning to Biomere in 2017.
