

## **Clinical pathology analysis to support *in vivo* studies**

Moderator: Anjli Venkateswaran PhD, Independent Consultant

Guest: Tia Coleman, Assistant Director, Clinical Pathology

### Abstract:

In this podcast, Tia Coleman discusses Biomere's clinical chemistry services to analyze samples collected from ***in vivo*** client programs and client supplied samples. Her group utilizes top-tier analyzers to measure hematology and chemical analytes from plasma samples. The analyzers are similar to the instruments in medical laboratories. Tia's group work closely with clients to validate new analytes, and the workflows are optimized to be flexible to meet evolving client requests.
