## **JOINN Awarded the “Sixth Batch of Industrial Technology Basic Public Service Platform” by the Ministry of Industry and Information Technology**

Recently, the Ministry of Industry and Information Technology announced the list of the sixth batch of industrial technology basic public service platforms. JOINN was the only company in Beijing to receive this honor thanks to its outstanding strength and contributions in the field of testing. This honor not only is a recognition of JOINN’s efforts in the field of drug research and development services over the years, but also shows that JOINN will play an even more important role in promoting the construction of technological infrastructure of China’s biopharmaceutical industry.

Since its establishment in 1995, JOINN has taken root in the field of preclinical verification and evaluation services for drug research and development, and has undertaken the world’s first genetic drug evaluation and China’s first preclinical evaluation of innovative drugs such as antibody drugs, ADC drugs, CAR-T, and CGT. JOINN has also established an evaluation technology platform to provide high-quality non-clinical drug safety evaluation, clinical trials and other services to global pharmaceutical companies and scientific research institutions. In terms of testing, thanks to its advanced technical equipment and a professional talent team, JOINN has established a complete quality control system to provide comprehensive, accurate and reliable testing and data support for drug research and development.

Previously, JOINN formed an innovation consortium as the leading unit, and won the bid for the Ministry of Industry and Information Technology’s “2024 Industrial Technology Basic Public Service Platform-Innovative Drug Screening Verification and Testing Evaluation Public Service Platform Project” to build China’s leading AI-empowered new drug discovery and screening verification and testing evaluation service platform. Through the construction of these two national-level industrial technology basic public service platforms, JOINN’s influence in the industry will be further enhanced, which will help the company to integrate more industry resources, actively carry out industry common technology research, and enhance the technological basic public service capabilities for China’s biopharmaceutical industry. JOINN will make even greater contributions to promote the development of China’s pharmaceutical industry and serve human health.

## 工业和信息化部第六批产业技术基础公共服务 平台名单

序号	推荐单位	单位名称	类型
1	北京市经济和信息化局	北京昭衍新药研究中心股份有限公司	试验检测类
2	天津市工业和信息化局	中汽信息科技(天津)有限公司	信息服务类
3	辽宁省工业和信息化厅	中国科学院沈阳自动化研究所	试验检测类
4	江苏省工业和信息化厅	胜科纳米(苏州)股份有限公司	试验检测类
5	江苏省工业和信息化厅	扬子江药业集团有限公司	创新成果产业化类
6	江苏省工业和信息化厅	中认英泰检测技术有限公司	试验检测类
7	安徽省工业和信息化厅	华东光电集成器件研究所	试验检测类
8	安徽省工业和信息化厅	玻璃新材料创新中心(安徽)有限公司	创新成果产业化类
9	安徽省工业和信息化厅	安徽绿能技术研究院有限公司	创新成果产业化类
10	山东省工业和信息化厅	山东省医疗器械和药品包装检验研究院	试验检测类
